PROFESSIONAL SUMMARY

Hands-on Technical Lead and Full-Stack Engineer with 8+ years of experience delivering enterprise web, mobile and SaaS applications. Led teams of up to 3 developers and owned delivery from requirements and architecture through testing, deployment and client handover. Strong in Flutter, Laravel/PHP, Vue.js, REST APIs and multi-tenant systems, with production experience across ordering, asset management, CRM and research platforms. Combines technical leadership with automated quality checks and specification-driven AI-assisted development.

WORK EXPERIENCE

Full-Stack Developer | Self-employed, Freelance Klang Valley | Jan 2017 - Present

- Delivered client and research applications across web, APIs, Android and Flutter, managing requirements, system design, development, testing and deployment.
- Built and maintained systems including Smart Masjid and ScoScreen, covering operational workflows, patient assessments and ongoing platform development.

Tech Lead | Flow Digital Asia Kota Damansara, Selangor | Oct 2025 - Aug 2026

- Led a mobile team of up to 3 developers, owning Flutter architecture, code review, technical troubleshooting and production releases.
- Delivered enterprise mobile applications and shared Laravel APIs; established development standards, automated testing and architecture checks for AI-assisted delivery.
- Worked with project managers, clients and developers to resolve technical issues, coordinate releases and support knowledge transfer.

Senior Full-Stack Developer | Flow Digital Asia Kota Damansara, Selangor | May 2025 - Sep 2025

- Developed Laravel, Vue.js and Flutter applications, translating enterprise requirements into business workflows, API integrations and database changes.
- Delivered PIPS sales modules, digital forms and e-signature authorisation workflows; supported production troubleshooting and handover to client-side developers.

Full-Stack Developer | Flow Digital Asia Kota Damansara, Selangor | Jan 2024 - Apr 2025

- Developed commercial web, API and mobile applications, including F&N GO's (which was transitioned from eOrder MY in React Native), and CUCKOO's WooCommerce checkout and payment workflows.
- Implemented frontend features, backend logic and third-party integrations; supported testing, mobile store releases and client handover.

Graduate Research Assistant | Universiti Kebangsaan Malaysia Bangi, Selangor | Mar 2021 - Sep 2023

- Developed grant-funded web, API, Android and wearable applications, including Petronas field-service workflows, supporting demonstrations, user acceptance testing and pilot deployment.

Research Assistant | Universiti Kebangsaan Malaysia Bangi, Selangor | Sep 2020 - Feb 2021

- Developed smart waste-management prototypes involving computer vision, sensors and data collection; maintained ZeroWMS and supported route-optimisation research.

Mobile Application Developer | Timetec Cloud Sdn Bhd Cyberjaya, Selangor | Jan 2020 - Aug 2020

- Maintained i-Neighbour and IOI Community Android apps, delivering features, bug fixes, SDK updates and Huawei support while coordinating QC and Google Play releases.

Project Manager | MyXLab Solutions PLT Bangi, Selangor | Mar 2019 - Dec 2019

- Managed BasKita development timelines, milestones, documentation and stakeholder coordination, including operational data preparation, testing, and Android/iOS release support.

Mobile Application Developer Intern | MyXLab Solutions PLT

Bangi, Selangor | Aug 2018 - Feb 2019

- Updated Android applications through SDK updates and continued UKMeals development, supporting release readiness and early commercialisation planning.

UI/UX Designer (Part-time) | MyXLab Solutions PLT

Bangi, Selangor | Mar 2019 - Dec 2019

- Designed and tested food-ordering interfaces through restaurant demonstrations and practical user testing, translating findings into usability improvements.

PROJECTS

HTS ALis | Asset Location Information System for Hicom-Teck See

Jul 2026 - Aug 2026

- Digitalized plant asset movements and paper sign-offs with a shared 5-stage approval engine, QR/GPS tracking, e-signatures and authorisation PDFs. Sole developer of the 43-screen, 8-module mobile client; expanded its suite to 2,205 tests through post-launch delivery.

Flowhubr | Flow Digital's in-house SaaS product

Sep 2025 - Aug 2026

- Built the mobile app from scratch, and re-platformed 13 feature modules from Riverpod to BLoC and Clean Architecture while owning mobile technical direction. Built 1,319 automated tests at 88.3% line coverage, enforced an 85% CI floor, and added checks for architecture boundaries and generated-code freshness.

PEOPLEAPS + SKILL2U | Multi-tenant Learning Management System

Sep 2025 - Feb 2026

- Established Domain-Driven Design and database-per-tenant architecture with automated provisioning and per-workspace role-based access. Scoped the rebuild against 170 legacy .NET endpoints and 45 entities, supporting learning, assessments, certifications and Zoom integration in the Laravel platform.

PIPS | PEOPLElogy Integrated Productivity System CRM + Sales Workflows

Jan 2025 - Aug 2025

- Developed end-to-end sales modules spanning lead tracking, qualification and conversion. Connected interactive Vue.js dashboards to Laravel workflow logic, state transitions and relational data, translating stakeholder requirements into a usable corporate sales pipeline.

F&N GO | B2B Ordering and Loyalty

Sep 2024 - Jun 2025

- Built the Flutter replacement for Fraser & Neave's live React Native ordering app and shipped to Google Play and the App Store. Delivered catalogue-to-checkout ordering, free-of-charge and purchase-with-purchase promotions, points and voucher redemption across 30 screens, with trilingual UI, device-integrity checks and Huawei HMS push support.
