

Danial Sim

TEAM LEAD | TECHNICAL LEAD | FULL-STACK AND MOBILE ENGINEER

Dengkil, Selangor, Malaysia | +60 19-240 2540 | danialsim95@gmail.com

linkedin.com/in/danialsim95 | github.com/danialsim95

Professional Summary

Hands-on engineering lead delivering enterprise mobile applications and SaaS platforms with Flutter, Laravel and Vue.js. Led a team of 6, shipped ordering and asset-management apps to Android and iOS, and established automated quality gates that supported 88.3% mobile test coverage. Owns architecture, migration planning, code review and release delivery, with specification-driven AI-assisted development.

Professional Experience

Team Lead | Flow Digital Asia

Oct 2025 - Aug 2026 | Kota Damansara, Selangor

- Led a 6-developer mobile team and owned architecture, code review and Android and iOS releases. Connected Flutter clients to shared Laravel APIs for enterprise asset management and SaaS collaboration.
- Established architecture checks, static analysis, generated-code freshness checks and coverage thresholds for specification-driven, AI-assisted delivery. A coverage-driven audit identified 9 production defects.

Senior Full-Stack Developer | Flow Digital Asia

May 2025 - Sep 2025

- Owned full-stack PIPS sales-workflow development, translating enterprise stakeholder requirements into Laravel business rules, relational data models and interactive Vue.js pipeline dashboards.

Full-Stack Developer | Flow Digital Asia

Jan 2024 - Apr 2025

- Served as primary developer on F&N's ordering platform, maintaining React Native eOrder MY and building its Flutter replacement. Owned architecture, native integrations and store releases through Jun 2025.
- Built CUCKOO Malaysia's WooCommerce checkout and payment subsystem, including transactional email and scheduled payment reconciliation.

Software Development Engineer | Independent Freelance

Jan 2017 - Present | Greater Kuala Lumpur

- Designed and delivered client web applications with Laravel, React and Angular, alongside Android modules; managed requirements, UI/UX prototyping, deployment and post-release support.

Graduate Research Assistant and Research Assistant | National University of Malaysia

Sep 2020 - Sep 2023 | Bandar Baru Bangi

- Developed grant-funded PHP, Laravel and Android applications, with UI/UX prototyping and user acceptance testing. Co-developed MinarVMS visitor management and augmented-reality indoor navigation.

Mobile Application Developer | TimeTec Group

Jan 2020 - Aug 2020 | Cyberjaya

- Developed native Android features for i-Neighbour and IOI Community, supporting performance profiling, testing, GitLab version control and Google Play releases.

Project Manager and Mobile Application Developer | MyXLab Solutions PLT

Jul 2017 - Dec 2019 | Bandar Baru Bangi

Project Manager: Mar - Dec 2019 | Mobile Developer: Aug 2018 - Feb 2019

UI/UX Researcher: Jul 2017 - Jul 2018

- Managed BasKita campus bus-tracking delivery across stakeholders, developers and milestones. Modernised legacy Android apps and conducted requirements, UI/UX and QA work for a food ordering system.

Selected Projects

FlowHubr | Team leadership and mobile architecture | Flutter, BLoC, Laravel

- Re-platformed 13 feature modules from Riverpod to BLoC and Clean Architecture while owning mobile technical direction. Built 1,319 automated tests at 88.3% line coverage, enforced an 85% CI floor, and added checks for architecture boundaries and generated-code freshness.

HTS ALis | Enterprise asset management | Flutter, Laravel

- Digitised plant asset movements and paper sign-offs with a shared 5-stage approval engine, QR/GPS tracking, e-signatures and authorisation PDFs. Sole developer of the 43-screen, 8-module mobile client; expanded its suite to 2,205 tests through post-launch delivery.

F&N GO and eOrder MY | B2B ordering and loyalty | Flutter, Kotlin, AWS Cognito

- Built the Flutter replacement for Fraser & Neave's live React Native ordering app and shipped to Google Play and the App Store. Delivered catalogue-to-checkout ordering, free-of-charge and purchase-with-purchase promotions, points and voucher redemption across 30 screens, with trilingual UI, device-integrity checks and Huawei HMS push support.

PEOPLEAPS and SKILL2U | Multi-tenant learning platform | Laravel, MySQL, AWS

- Established Domain-Driven Design and database-per-tenant architecture with automated provisioning and per-workspace role-based access. Scoped the rebuild against 170 legacy .NET endpoints and 45 entities, supporting learning, assessments, certifications and Zoom integration in the Laravel platform.

PEOPLElogy PIPS | Enterprise CRM and sales workflows | Laravel, Vue.js

- Developed end-to-end sales modules spanning lead tracking, qualification and conversion. Connected interactive Vue.js dashboards to Laravel workflow logic, state transitions and relational data, translating stakeholder requirements into a usable corporate sales pipeline.

Technical Skills

Languages: Dart, PHP, SQL, JavaScript, Java, Kotlin, Bash

Mobile: Flutter, BLoC, Cubit, Riverpod, Clean Architecture, React Native, Android, Dio, Retrofit, dependency injection, Firebase Crashlytics and Messaging, Huawei HMS

Backend and Web: Laravel, REST APIs, Domain-Driven Design, multi-tenancy, role-based access control, MySQL, Vue.js, Inertia.js, React, Angular, WordPress, WooCommerce, CodeIgniter

Cloud and Delivery: AWS Cognito, S3, EC2, IAM, Git, GitHub Actions, CI/CD, Android and iOS signing, App Store Connect, Google Play Console

Quality and Leadership: Unit and widget testing, bloc_test, mocktail, PHPUnit feature tests, coverage enforcement, code review, migration planning, engineering documentation, AI-assisted development

Education

Bachelor of Information Technology with Honours | National University of Malaysia (UKM)

Sep 2015 - Nov 2019 | Distinction | Major in Data Science | CGPA 3.85

Certifications and Languages

Android Certified Application Developer | Android ATC | 2017

Android assessment certificate | TestDome | 2023

Languages: English, Malay and Chinese (full professional proficiency)
