Professional Summary

Software engineer and technical lead with experience across enterprise mobile apps, SaaS backends, e-commerce and university research. Led a mobile team of up to 6 developers and delivered production systems with Flutter, Laravel and Vue.js. Combines hands-on architecture and release ownership with automated testing and specification-driven, AI-assisted development.

Professional Experience

Team Lead | Flow Digital Asia

Oct 2025 - Aug 2026 | Kota Damansara, Selangor

- Led a 6-developer Flutter mobile team, owning architecture, code review, technical direction and release engineering for FlowHubr, a project, task and timesheet management platform.
- Migrated FlowHubr from Riverpod to BLoC and Clean Architecture across 13 feature modules. Built 1,319 automated tests and achieved 88.3% line coverage with an enforced 85% CI threshold.
- Established architecture checks, strict static analysis, generated-code freshness checks and pre-push validation to support specification-driven, AI-assisted delivery. A coverage-driven audit identified 9 production defects.
- Delivered the HTS ALis asset-management mobile app as sole developer, covering 43 screens and 8 modules. Implemented QR and GPS asset movements, role-based access, e-signatures and authorisation PDFs; expanded the test suite to 2,205 tests through post-launch work.
- Built the shared Laravel asset-management API and 5-stage approval engine used by web and mobile clients, including asset loans, movement history and approval notifications.
- Established Laravel Domain-Driven Design and database-per-tenant architecture for PEOPLEAPS, supporting automated tenant provisioning, per-workspace permissions and learning workflows. Scoped the rebuild against the incumbent .NET system's 170 endpoints and 45 entities.

Senior Full-Stack Developer | Flow Digital Asia

May 2025 - Sep 2025

- Developed PEOPLEogy PIPS sales workflows with Laravel and Vue.js, translating stakeholder requirements into sales modules and interactive pipeline dashboards.

Full-Stack Developer | Flow Digital Asia

Jan 2024 - Apr 2025

- Served as primary developer for F&N GO, the Flutter replacement for the React Native eOrder MY app. Built ordering, promotions, points and vouchers across a 30-screen application; owned architecture and Android and iOS release delivery through Jun 2025.
- Integrated AWS Cognito, device-integrity checks, Kotlin platform channels and Huawei HMS push notifications for F&N GO. Delivered English, Malay and Chinese interfaces and maintained the legacy app during the transition.
- Built CUCKOO Malaysia's WooCommerce checkout and payment subsystem, including order status, transactional email and scheduled payment reconciliation.

Professional Experience Continued

Software Development Engineer | Independent Freelance

Jan 2017 - Present | Greater Kuala Lumpur

- Designed and delivered client web applications with Laravel, React and Angular, alongside Android modules; managed requirements, UI/UX prototyping, deployment and post-release support.

Graduate Research Assistant and Research Assistant | National University of Malaysia

Sep 2020 - Sep 2023 | Bandar Baru Bangi

- Developed PHP and Laravel web modules and native Android applications for grant-funded research. Created interfaces with Figma and Adobe XD and supported user acceptance testing.
- Co-developed MinarVMS, a visitor management system with augmented-reality indoor navigation, contributing the Android frontend and PHP backend.

Mobile Application Developer | TimeTec Group

Jan 2020 - Aug 2020 | Cyberjaya

- Developed native Android features for residential and visitor management apps, including i-Neighbour and IOI Community. Supported testing, performance profiling, GitLab version control and Google Play releases.

Project Manager and Mobile Application Developer | MyXLab Solutions PLT

Jul 2017 - Dec 2019 | Bandar Baru Bangi

Project Manager: Mar - Dec 2019 | Mobile Developer: Aug 2018 - Feb 2019

UI/UX Researcher: Jul 2017 - Jul 2018

- Managed delivery of BasKita, a UKM campus bus tracking system, coordinating stakeholders, developers and milestones. Modernised legacy Android apps and supported requirements, UI/UX and testing for a food ordering system.

Technical Skills

Languages: Dart, PHP, SQL, JavaScript, Java, Kotlin, Bash

Mobile: Flutter, BLoC, Cubit, Riverpod, Clean Architecture, React Native, Android, Dio, Retrofit, dependency injection, Firebase Crashlytics and Messaging, Huawei HMS

Backend and Web: Laravel, REST APIs, Domain-Driven Design, multi-tenancy, role-based access control, MySQL, Vue.js, Inertia.js, React, Angular, WordPress, WooCommerce, CodeIgniter

Cloud and Delivery: AWS Cognito, S3, EC2, IAM, Git, GitHub Actions, CI/CD, Android and iOS signing, App Store Connect, Google Play Console

Quality and Leadership: Unit and widget testing, bloc_test, mocktail, PHPUnit feature tests, coverage enforcement, code review, migration planning, engineering documentation, AI-assisted development

Education

Bachelor of Information Technology with Honours | National University of Malaysia (UKM)

Sep 2015 - Nov 2019 | Distinction | Major in Data Science | CGPA 3.85

Certifications and Languages

Android Certified Application Developer | Android ATC | 2017

Android assessment certificate | TestDome | 2023

Languages: English, Malay and Chinese (full professional proficiency)
